SUMMARY

I recently graduated with a BSc in CSIT and I'm eager to enhance my skills in software engineering. I'm proficient in HTML, CSS, and JS, and I specialize in using React to create reusable components. I excel in problem-solving and enjoy collaborating with backend teams to integrate seamlessly with APIs. I'm excited about contributing to a team's success and making meaningful solutions.

EXPERIENCE

- Learned the basic of ReactJS (reactive forms, api integration, state management)
- Worked on components for the company's landing page
- Worked on the User profle forms

EDUCATION

2018-2023

TRIBHUVAN UNIVERSITY
BSc CSIT

PROJECTS

2023 - Ongoing

HOTEL BOOKING APPLICATION
This is a personal project developed using React as frontend which made calls to a .Net Api. We used **Formik forms** for form control and **Yup** for validation, **react router** for routing, **bootstrap** and **axios** for api calls.

2022 - 2023

CROSSWORLD PUZZLE GENERATOR
This app was developed using vanilla JS. We used the open AI api's to generate a crossword puzzle data and we rendered the data using js in the frontend.

SKILLS

- React
- JS
- HTML/CSS
- Bootstrap
- Git
- OOP
- Good communication skill
- Able to work in a team
- Great problem solving skill
